- troubleshooting

## NOTABLE CERTIFICATION

**CCNA Introduction to Networks**

Cisco Networking Academy

**CCNA Switching, Routing and Wireless Essentials**

Cisco Networking Academy

**CCNA Enterprise Networking, Security and automation**

Cisco Networking Academy

## TECHNICAL SKILLS

Configuration LAN Network

Configuration Basic Wlan on WLC

Switch security Configuration

DHCP Configuration

HSRP Configuration

Ether channel Configuration

Vlan Configuration

## FRONTEND SKILLS

Git   React.js   javascript   HTML

Css   Linux   Tailwind   NextJs

## SOFT SKILLS

**Strong communication and collaboration skills**

**Leadership**

**Ability to work well under pressure**

**Problem-solving**

**Adaptability/Flexibility**

# PROJECTS

---

## E-commerce website

Designed a user-friendly, visually appealing interface using NextJs for a seamless user experience.

- Built a responsive and modern e-commerce website using Next.js and daisy-UI. I integrated an API and added Firebase. This allows users to seamlessly browse and discover products, add them to their cart, and apply filters based on price, ratings, and product type for easy navigation. Additionally, users can remove items from their cart and view the total price of products selected. I also implemented a search functionality. I successfully delivered a fully functional website that met all project objectives within the specified timelines.

---

## Movie project

<https://reelio-topaz.vercel.app/>

Designed a user-friendly, visually appealing interface using NextJS for a seamless user experience.

- Built a responsive movie website with Next.js, daisy-UI and API. Provided users with seamless browsing to discover movies, explore actors and their related films. Implemented genre-based navigation and featured sections for top-rated and popular movies. Successfully delivered a fully functional website meeting project objectives within specified timelines.

---

## Mad lib project

<https://madlibs-nine.vercel.app/>

Designed a user-friendly, visually appealing interface using vanilla js

- Created a dynamic MadLib generator using Vanilla JavaScript and CSS for a responsive user experience. This interactive web application prompts users for various parts of speech and dynamically generates a story based on their inputs. The project showcases proficiency in front-end development, emphasizing clean and responsive design principles
